PROFILE

Computer Science undergraduate at BITS Pilani Dubai, focused on machine learning and cybersecurity. Experienced in building LLM-based applications, RAG pipelines, and full-stack data tools through internships and independent projects. Seeking a role in e-commerce where I can apply my programming, data, and AI skills.

EXPERIENCE

Cybersecurity Intern — Exida Jan 2026 – Jul 2026

- Performed cybersecurity work and developed a locally hosted LLM RAG pipeline to read and interpret P&ID (piping and instrumentation diagram) engineering drawings.

Tech Intern — Züblin / Strabag SE Jul 2025 – Aug 2025

- Worked with virtual machines and computer networks, supporting the company's IT infrastructure.

Intern — Standard Global Quality Services Jun 2024 – Aug 2024

- Handled data entry, organization, and reporting in Microsoft Excel to support quality-service operations.

PROJECTS

Nexus — Private, Self-Hosted AI Workbench

- Fully self-hosted AI assistant for environments that cannot send data to cloud AI (regulated industries, air-gapped networks), built on Open WebUI with Ollama serving open-weight models and ChromaDB as the knowledge base.
- Built a custom smart-routing layer that inspects each request and dispatches it to the right specialist model (fast, reasoning, coding, or vision), plus document chat over uploaded files via RAG.
- Implemented a sandboxed code interpreter for document generation — static denylist, resource limits, and bubblewrap isolation — and a Blueprint Analyzer that reads instrument tags off P&ID diagrams with a vision model and cross-references a failure-mode knowledge base.

VoiceGuide AI — Multilingual Travel Itinerary Planner

- Voice-driven travel planner built with Python and Streamlit that generates detailed 8–12 activity itineraries from spoken input.
- Integrated Azure Cognitive Services (speech-to-text and text-to-speech) and Azure OpenAI to support 15+ languages with auto-detection and bilingual output, plus PDF export of the final itinerary.

Automated Price Tracker

- Python automation tool that monitors e-commerce sites for price drops and triggers an alert when a product falls below a target price.
- Built with Requests and BeautifulSoup4 for scraping and the Schedule library to run continuously at set intervals.

Interactive Stock Market Dashboard

- Real-time financial dashboard in Python and Streamlit that pulls live market data via yfinance and renders interactive, zoomable charts with Plotly.
- Uses Pandas for data handling and includes a CSV export feature for offline analysis.

URL Shortener API

- FastAPI service that converts long URLs into short keys and tracks per-link click analytics in real time, with data persisted in SQLite and auto-generated Swagger documentation.

AI-Powered PDF Summarizer

- Document tool that extracts text from PDFs with PyPDF2 and generates concise summaries using the OpenAI API, fronted by a Streamlit interface.

SKILLS

Programming: Python, Java, C, SQL, JavaScript, HTML/CSS, Bash

AI & Data: RAG, Ollama, ChromaDB, open-weight LLMs, OpenAI API, Azure OpenAI, Azure Cognitive Services, Pandas, Plotly, MATLAB

Frameworks & Tools: Streamlit, FastAPI, Open WebUI, SQLite, BeautifulSoup, Linux, Git / GitHub, Microsoft Office, Canva

EDUCATION

B.E. Computer Science — BITS Pilani, Dubai Campus 2022 – Present

St. Antony's Public School 2020 – 2022

Abu Dhabi Indian School 2014 – 2020

LANGUAGES

English (fluent) • Malayalam (fluent) • Hindi • Spanish (A1) • French (A1)

ACHIEVEMENTS

Repeat school topper in IBT, IOF Olympiad, ASSET, and Shastra Pratibha • Marrs Spelling Bee Finalist
